

"Identifying Malocclusion"

Strategies for your dental team

Dr. Tarryn Mac Carthy & Dr. Meg Dombroski

Abfractions, attrition, crossbites, periodontal defects, traumatic occlusion and more! Much of the dental findings that we see in routine examinations are influenced by the patient's occlusion. In this two hour presentation geared towards the dental team, we will provide tools for identifying malocclusion and strategies for talking to your patients about malocclusion and its influence on oral health.

power Continuing Education Lectures

- 2 CE Credits through Academy of General Dentistry
- No charge
